

ALight Technology And Services Limited (U.K)

ALight Technologies USA Inc

< Web Veta / >

Pair your SEO with an intelligent internal search engine – The ultimate winning combination for successful online presence!

Features

- Free Full-Text Search
- Higher relevance than default search of CMS and blogging platforms
- Search from across your own content—domain, sub-domains
- Consistent search results
- Enhanced accuracy using A.I.
- Customizable.
- Easy to Integrate with just 2—3 lines of HTML.
- Don't just show search results, show LLM responses generated from your content using the same 2—3 lines of HTML!

Search for your websites!

Enhance the search capabilities of your websites!

Your SEO efforts bring users to your websites by ranking up in search engines such as Google, Bing. But, are people finding what they are looking for? Does your website have an advanced internal search for them to search and know more?

Or are they just navigating away to the next website in the Google / Bing search results?

Are less user retention, people not being able to find what they are looking for reasons for losing customers?

Advanced search for your websites!

Advanced, customizable, easy to integrate! No SDKs needed!

It's a no-brainer, every website needs an advanced search engine!

Use the free-tier.

Use the basic paid tier if you want accurate multi-sub-domain based search.

Unlock the power of A.I based enhancements for making search results more accurate.

Allow the power of LLMs to provide easy responses to user's search terms in the RAG tier.

People are probably going through a list of search results on Google/Bing and came to your website, wanted more information and searched inside your website. Instead of providing another list of search results and asking to go through the links, provide a precise and concise answer using the power of Generative AI and LLMs

Easy Integration

Semantic Search
results and A.I
generated con-
tent based on
your own content

Integration

Copy these into the head and place the HTML element in the body

head:

```
<script src="https://1.api.webveta.alightservices.com/js/scriptv0.0.2.js" type="text/javascript"></script>  
<link href="https://1.api.webveta.alightservices.com/css/stylev0.0.1.css" rel="stylesheet" />
```

body:

```
<a id="ws-btnSearch" data-id="d6d8318e-7594-11ef-83ca-6045bdef87af" href="#">Search</a>  
or  
<button id="ws-btnSearch" data-id="d6d8318e-7594-11ef-83ca-6045bdef87af" href="#">Search</button>  
or  

```

The following are optional but use for faster connections from users browsers:

head:

```
<link rel="dns-prefetch" href="//1.api.webveta.alightservices.com">  
or  
<link rel="preconnect" href="//1.api.webveta.alightservices.com">
```

How can WebVeta help SMEs

SEARCH

AI generated content:

WebVeta can help SMEs by providing a unified and consistent search engine for their websites and apps. It allows SMEs to show relevant content when searched for, which can help turn visitors into customers. Additionally, SMEs can cross-promote with partners and include relevant search results from inter-related government organizations. By using WebVeta, SMEs can improve their search experience, increase customer engagement, and reduce customer care frustration by making their existing content easily accessible.
