WebVeta – Revolutionizing website's internal search with AI

UNLOCKING THE POWER OF PUBLIC WEBSITES WITH AI-POWERED INTENT-BASED SEARCH

Unlock the Power of Intent-based Search for Your Website

▶ Embeddable search engine that uses A.I. for intent-based search

▶ Simple integration with just a few lines of HTML

▶ Enhance user experience and engagement on your website

Current Challenges in internal web search

▶ Limited relevance and accuracy in search results

▶ Lack of customization options

▶ Lack of advanced search features

Introducing WebVeta - Innovative AI-based Search Engine

▶ Uses A.I. for intent-based search and recommendation

▶ Easy integration

▶ Customized RAG responses with cached results

Advanced Search Features for Enhanced User Experience

▶ Full-text search, keyword search, and intent-based search capabilities

▶ Support for RAG (Retrieval Augmented Generation) using LLMs

▶ Customizations

Unlock the Power of WebVeta's Advanced Search Technology

► Fast search results

► Proprietary techniques combining the best of full-text, keyword and semantic search.

► Easy integration by just copying and pasting 2 -3 lines of HTML!

Boost Engagement, Conversions, and Customer Satisfaction

▶ Enhanced user experience leads to increased engagement and conversions

▶ Improved customer satisfaction through more relevant search results

▶ RAG responses for providing accurate answers
