

# LightAccess

A way to beat session hijacking hackers!

Zero Trust Network Access and more for normal people and businesses.

Idea stage!

# Disclaimer

- NOT associated to 'identity exchanging' / 'identity buying-selling (underworld market for clearance range identities)' mafia anarchists.
- NOT associated to Kasab type of container / dog travel economic offenders, criminals alibi's of being overseas.
- NOT associated to cyber terrorists violating privacy and human rights by using invisible drones capable of invisible cameras, invisible speakers and mind reading equipment.

# Problem

- **Cyber terrorists (traitor spies) doing OTP thefts, OTP theft bank accounts, shadowing, stalking, identity theft, identity distortion using invisible drones capable of invisible cameras, invisible speakers and mind reading capabilities equipment + targeted hacking and cracking sessions within a minute or two.**

# Solution

- **Multiple levels of security needs to be implemented:**
  - **Mind reading: Password Managers need to be used**
  - **Invisible cameras: OTP theft should be prevented.**
  - **Secure browsing: VPNs need to be used but still they hack in under 4 minutes.**
  - **LightAccess concept is a multi-level secure concept and has customized VPN + several other things and beats the threats of OTP thefts, session hijacking.**

## Size of the problem

### Identity theft hits record levels in 2025

#### 2025 is on track to be the worst year on record

- **2025 Q1–Q3 reports:** 1,158,000
- **2024 full-year reports:** 1,135,265
- **Increase:** 2.0% — marking the first time three quarters have exceeded a prior full year
- **Projected 2025 full year: 1.54 million reports** (+36% vs. 2024) using a conservative Q1–Q3 average

Full-year data projections based on the average quarterly growth rate in 2025 (4.95%) suggest this year could be on track to reach **to 1.86 million identity theft reports by the end of Q4**, depending on seasonality effects.

- [2025 Identity Theft Statistics: A Record Year For Fraud](#)

# Size of the problem

- **Exploding costs:** Industry estimates put global cybercrime losses on the order of \$1.2–1.5 trillion in 2025 conservative view up from the low-trillion range prior, while holistic models project up to \$10.5 trillion annually. This implies roughly tens of billions lost per day worldwide.
- **Incident volumes surge:** In the US alone, the FBI's IC3 reported ~859,500 complaints in 2024, with \$16.6 billion in losses. That's roughly 2,400 incidents daily and \$45 million lost per day in the US. Reported global incidents are also rising, driven by increased reporting requirements and larger attack surfaces.
- **Top crime types:** Phishing and social engineering dominate as entry vectors about 57% of organizations see daily or weekly phishing attempts, and phishing was the initial breach vector in ~16% of incidents. Compromised credentials are even more

## ■ Cybercrime Statistics 2025: Trillions in Losses Worldwide

## Current Status

- Free products SimplePass, SecSMS are basic but free password manager and Secure OTP transfer applications. Secure OpenVPN installer.
- <https://simplepass.alightservices.com/>
- <https://github.com/ALightTechnologyAndServicesLimited/secure-openvpn-install>
- SimplePass - <https://www.youtube.com/playlist?list=PLs7D8ybThnZiVEZ7wk13Hv4OFyM8v5zH0>
- SecSMS - <https://www.youtube.com/playlist?list=PLs7D8ybThnZgg0s3A4t72RB63ZzMZmch3>

## Current Status (contd...)

- Development of security focused VPN has started, but not launched yet. Beta gets launched in 5 weeks!

# About Startup

- **ALight Technology And Services Limited (U.K) and ALight Technologies USA Inc (USA) are incorporated by Mr. Arumilli Kanti Kalyan (Indian citizen residing in Visakhapatnam)**
- <https://www.alightservices.com/>
- <https://www.youtube.com/@alighttechnologyandservicesltd>
- **Offers some open-source products, free products, custom development, managed IT, SaaS product [WebVeta](#).**
- **WebVeta part of Microsoft for Startup Founders, NASSCOM 10000, winner of 2 awards in UK.**
